### EVERGREENS

These Evergreens are specimens, having good root system, owing to frequent transplanting. It being difficult to transplant Evergreens, we cannot, under any circumstances, guarantee them further than that delivery shall be made in first class condition. B. & B. is Balled and Burlapped when shipped. This gives the best results, and we recommend they be ordered this way.

## ROSES

Our Roses are strong plants, grown outdoors, well rooted, hardy and first class. Every plant has blossomed before it is shipped, and is far more valuable than a mere tender shoot started in a greenhouse and without strength to stand the shock of transplanting.

How to grow roses strong and vigorous has been a life study with us. We are among the largest growers of Roses in the country and the list below embraces varieties that will succeed over a wide extent of country. We aim to grow every Rose that has merit, but name only those whose merits are such as to commend them to the average Rose lover.

**Hardy Climbing Roses**

Following is a list of the best that can be had. The perfect hardiness of this class of Roses, their strong growth and luxuriant foliage, adapt them for covering arbors, walls, trellises, and unsightly objects, which, together with their immense clusters of beautiful flowers commend them to all lovers of the beautiful. Require little pruning, except to thin out weak or dead branches.

We wish to call your special attention to the Dr. W. Van Fleet and Silver Moon. Color of Dr. W. Van Fleet is a remarkable delicate shade of flesh pink, deepening to rosy flesh in the center. Flowers full of double, delicately perfumed, buds pointed, stems 10 to 15 inches long; fine for cutting. Silver Moon, clear silvery white, very large, sometimes the flowers are 4 inches across.

Rule: Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43560) will give the number of trees to an acre.
